

# Nijat Mammadov

Collaborated with both attack and defense teams to identify and mitigate vulnerabilities. Engaged with internal and external clients throughout planning, scoping, and reporting stages, presenting complex vulnerabilities in a clear manner for both technical and non-technical stakeholders

## Work Experience

### Information Security Engineer

EarthLink, October 2024 - August 2025

- Handled and responded to various cybersecurity incidents including phishing, malware, DDoS, and ransomware attacks.
- Conducted threat analysis, detection, and intelligence gathering using open-source and proprietary tools such as VirusTotal, ThreatFox, Shodan, and AbuseIPDB.
- Deployed and configured SentinelOne agents; performed log analysis and investigated endpoint alerts.
- Developed and executed penetration testing techniques for web applications, systems, and networks.
- Performed log analysis and security monitoring using SentinelOne.
- Used Hornetsecurity for email threat detection, anti-phishing analysis, and email flow auditing.
- Performed vulnerability assessments using Nessus (Tenable) and collaborated with teams to ensure timely remediation.
- Conducted Azure user access audits to detect anomalies and enforce identity-related security controls.
- Monitored attack alert platforms and conducted deep/dark web monitoring to identify leaked credentials and organizational exposure.
- Participated in Digital Forensics and Incident Response (DFIR) training and supported incident handling processes.
- Reviewed Checkmarx reports as part of CI/CD security operations and supported secure DevOps practices (excluding direct code scanning).

### Cyber Security Analyst

CERT.AZ, Feb 2023 - June 2023

- Handled and responded to various cyber security incidents, such as phishing, malware, DDoS, and ransomware attacks
- Conducted threat analysis, detection and intelligence gathering using open source and proprietary tools
- Developed and executed penetration testing techniques for web applications, systems and networks
- Performed log analysis and security monitoring using Splunk
- Had training in Digital Forensic and Incident Response (DFIR)

### Cyber Security Analyst

Aztekom LLC, Nov 2022 - March 2023

- Performed Web Penetration Testing of companies and identified and reported the vulnerabilities
- Performed Network Penetration Testing of Specified Subnetworks and identified and reported the vulnerabilities
- Developed Python scripts to automate security processes
- Analyzed and interpreted logs from web servers, firewalls, and other sources (Manual and Auto)

## Skills

### Technical Skills

- Penetration Testing
- SOC Operations
- SentinelOne (EDR/XDR)
- SIEM (Splunk/ELK), Log Analysis, Incident Response, Threat Intelligence
- Vulnerability Assessment (Nessus),
- Azure Security Auditing
- Python/Bash
- Malware Analysis
- DLP, WAF, Firewalls, Email Security

### Soft Skills

- Critical Thinking
- Deep Googling
- Curiosity and Open Mind
- Presentation & Communication

### Languages

- Azerbaijani (native)
- English (fluent)
- Turkish (fluent)
- Russian (pre-intermediate)

## Certifications

- Certified AppSec Practitioner (CAP) (ID: 8192272)
- SOC Analyst (Letsdefendio)
- IBM Cybersecurity Analyst
- IKT LAB - Cybersecurity, Network Administration Training

## Educational Background

### MSc of Computer Science

Eötvös Loránd University  
Sep 2023 - May 2025

- Specialization in Cybersecurity

### BSc of Information Technology

Baku Engineering University  
Sep 2019 - May 2023

- GPA: 87
