

Nijat Mammadov

Collaborated with both attack and defense teams to identify and mitigate vulnerabilities. Engaged with internal and external clients throughout planning, scoping, and reporting stages, presenting complex vulnerabilities in a clear manner for both technical and non-technical stakeholders

Work Experience

Information Security Engineer

EarthLink, October 2024 - October 2025

- Investigated and contained security incidents, including zero-day exploits, APTs, large-scale DDoS, and data exfiltration, minimizing operational impact.
- Conducted threat research and profiling using VirusTotal, ThreatFox, Shodan, and AbuseIPDB to identify emerging risks.
- Deployed and monitored SentinelOne EDR, analyzing endpoint logs and telemetry to detect suspicious activity.
- Leveraged SentinelOne data for proactive monitoring and early threat detection.
- Enhanced email security via Hornetsecurity, performing phishing detection, message tracing, and compliance checks.
- Ran Nessus vulnerability scans and collaborated with IT teams to validate remediation and reduce risk.
- Audited Azure identities and permissions to detect anomalies and enforce least-privilege policies.
- Monitored security alerts and deep/dark web sources for leaked credentials and potential threats.
- Supported DFIR investigations through evidence collection, log analysis, and root cause identification.
- Reviewed Checkmarx results in CI/CD pipelines and advised development teams on secure coding practices.

Cyber Security Analyst

CERT.AZ, Feb 2023 - June 2023

- Handled and responded to various cyber security incidents, such as phishing, malware, DDoS, and ransomware attacks
- Conducted threat analysis, detection and intelligence gathering using open source and proprietary tools
- Developed and executed penetration testing techniques for web applications, systems and networks
- Performed log analysis and security monitoring using Splunk
- Had training in Digital Forensic and Incident Response (DFIR)

Cyber Security Analyst

Aztekom LLC, Nov 2022 - March 2023

- Performed Web Penetration Testing of companies and identified and reported the vulnerabilities
- Performed Network Penetration Testing of Specified Subnetworks and identified and reported the vulnerabilities
- Developed Python scripts to automate security processes
- Analyzed and interpreted logs from web servers, firewalls, and other sources (Manual and Auto)

Skills

Technical Skills

- Penetration Testing
- SOC Operations
- SentinelOne (EDR/XDR)
- SIEM (Splunk/ELK), Log Analysis, Incident Response, Threat Intelligence
- Vulnerability Assessment (Nessus),
- Azure Security Auditing
- Python/Bash
- Malware Analysis
- DLP, WAF, Firewalls, Email Security

Soft Skills

- Critical Thinking
- Deep Googling
- Curiosity and Open Mind
- Presentation & Communication

Languages

- Azerbaijani (native)
- English (fluent)
- Turkish (fluent)
- Russian (pre-intermediate)

Certifications

- Certified AppSec Practitioner (CAP) (ID: 8192272)
- SOC Analyst (Letsdefendio)
- IBM Cybersecurity Analyst
- IKT LAB - Cybersecurity, Network Administration Training

Educational Background

MSc of Computer Science

Eötvös Loránd University

Sep 2023 - May 2025

- GPA: 78

BSc of Information Technology

Baku Engineering University

Sep 2019 - May 2023

- GPA: 87
